

Canara Critical Facilities Services

IMPROVE YOUR PRODUCTIVITY AND FAILURE PREVENTION WITH A PROVEN PROGRAM THAT INTEGRATES PEOPLE, PROCESSES, AND SYSTEMS

Operating and maintaining a data center is a complex venture. It requires proper facilities management procedures and qualified maintenance staff for mission critical equipment such as UPS, back-up power, generators and cooling systems. With the goal of improving efficiencies, you work with vendors with expertise in these systems. You gain flexibility but must manage multiple vendors and contractors and ensure that consistent standards are being maintained. This can be time consuming and take you away from your priorities.

Let us help.

Canara can help you manage the maintenance and operations of your core power infrastructure with a variety of service options. We work collaboratively with you and complement the efforts and functions of your internal staff. Canara Critical Facilities Services (CFS) offers a flexible engagement model that can be designed to meet your specific needs.

BENEFITS

- Flexible services portfolio from facility assessment and resource coordination to full, end-to-end battery management services
- Proven programs and tool sets reduce downtime and improve efficiency
- Flexible and scalable engagement that meets your specific needs
